

Performance Profile

You expect: the utmost precision and top quality

We machine for you: prototype, custom and serial parts for mechanical engineering.

You expect: single-source solutions

We offer a large range of services: in addition to turning and milling, we do drilling, deep-hole drilling, super finishing, grooving and broaching of components. We also do surface treatment, heat treatment and laminating.

You expect: a professional and reliable partner

We work with a high degree of flexibility regarding enquiries, orders and problem-solving. To verify us as a reliable and professional partner, our high standards are certified to DIN EN ISO 9001:2008.

You expect: individual and flexible solutions

We process the most diverse materials with our own modern machinery and equipment. Thanks to the latest technology and our comprehensive processing know-how we are able to manufacture even most complicated and complex components.
